Good to know before you buy

- The sales video is a dramatic money story with big claims. Judge it as a mindset and relaxation habit.
- Digistore24's own note says typical buyers earn significantly less or no money from the product.
- Results are personal and gradual; give it the full 25-day routine before you decide.
- It is a mindset tool, not financial advice. For debt or investing, talk to a qualified adviser.
- Use headphones at a comfortable volume, and never listen while driving.

Sales claims vs. what to expect

In the sales video	What you can realistically expect
Attracts money to you with a 7-second ritual	A short daily audio can help you feel calm and focused. Money still comes from actions: earning, saving and spending choices.
Theta is "the gateway to money"	Theta is a normal deep-relaxation state. It is linked with calm and creativity, not with income.
Changes start "immediately"	Many people feel relaxed after a session. Habit changes take weeks; the seller itself suggests 25 days.
Backed by brain studies	The cited studies are about brain structure and brainwaves in general, not about this audio.
90-day money-back guarantee	Confirmed: the seller's terms allow refunds requested within 90 days.

Research in plain words

Brainwaves are the electrical rhythms of the brain. Theta (about 4-8 Hz) appears in deep relaxation and daydreaming. Brainwave entrainment uses repeating sound patterns to nudge the brain toward a matching rhythm. Studies on rhythmic audio and binaural beats show small, mixed effects on relaxation, mood and attention: a sensible daily mindset habit, not a way to attract money.
