- It is very similar to the Billionaire Brain Wave; compare both with the tool on this page before you buy.
- It is not financial advice. For debt or investing decisions, talk to a qualified adviser.
- Use headphones at a comfortable volume, and never listen while driving.

Sales claims vs. what to expect

In the sales video	What you can realistically expect
A 7-second ritual makes money start appearing	A calm morning routine can help you focus. Money still comes from earning, saving and spending choices.
Activates your "Money Wave" in the hippocampus	Theta is a normal relaxed state. Research does not link it to income.
Thousands of happy users	The seller's disclaimer says testimonials may be dramatized with digital avatars.
Price may rise after today	Typical urgency wording. The $39 price has been stable at checkout.
60-day money-back guarantee	Confirmed: the seller's terms allow refunds requested within 60 days.

Research in plain words

Theta waves (about 4-8 Hz) appear in deep relaxation and daydreaming. Brainwave entrainment uses repeating sound patterns to nudge the brain toward a matching rhythm. Studies on rhythmic audio and binaural beats show small, mixed effects on relaxation, mood and attention: a sensible morning mindset habit, not a way to attract money. The seller notes that testimonials may be dramatized.
